It is very important that you follow the steps carefully, so that no mistake is made. After that you have to plug it back and remove any external hardware devices that you might have used to connect it with. Usually, it is located in a slot on the rear of your computer. How To Reset The Default Login Details? Before you can start resetting the default login details of your Ubee device, you must turn off the power. As the router will not work without an Internet connection, this step is very necessary. Then disconnect all external hardware devices from your computer and plug the Ubee into an unused port on the back of your computer. You will then turn on the reset button, which is located on the front panel. If you find the reset button, that means you are ready to go. Before you actually start changing the login details, you have to make sure that you know what you are doing. For starters, make sure that you have the administrator password as you need to change various settings in your router. You can't do it unless you have this secret code. Now that you have the router at the working level, you can start resetting the various things that you need to. When you are done with this task, you have to identify the default username is "admin". Once you have identified the appropriate user names and passwords, you can now perform the following procedure. For your information, change the default username and password for your Ubee router. You can choose "Change Password" from the main menu of your Ubee web browser. Normally, you would need to enter the new usernames and passwords. When everything is done, you can now power up your Ubee router. At this time, it is recommended that you use the login box that is displayed on your router. Click "reset" on the Ubee router's main page and then you can log into your account. You can also know more 192.168.1.1 Admin login. How To Change Your Ubee Router's Login Details? When you are in your account, find the page that displays the reset button. Click this button. Now that you are in this page, you have to type the new usernames and passwords that you have just typed. Keep in mind that you have to make sure that these username and passwords are not already used by other users. For security reasons, it is suggested that you change your Ubee router's default username and password. If you have done this, you can now access the reset page. Once you have reached this page, you will see that your Ubee has been reset. It is important for you to know that resetting your router will permanently delete all settings and programs that you have set. How to change password and username for your Ubee's reset webpage, you might be wondering where you should start from. Well, there are a lot of things that you can do. For one, you can either reset your default username and password or you can create a new one. Creating a new one requires that you have a fully functional Windows PC that is connected to the internet. The other option is to reset the router using a CD-ROM. What Are The Few Steps That You Should Follow In Order To Reset Your Router? There are actually a few steps that you need to follow in order to the computer via a USB cable. Once this is done, you will then have to insert a blank CD inside the Ubee card slot. Plug the CD into the Ubee card reader and then proceed to turn on your Ubee. You will hear a beep, so if you have not inserted any CD, you need to do that now. Once your Ubee has been turned on, you can then plug in a blank CD into your Ubee's USB port. If you have not yet done so, it is time to go to the 'My Computer' icon and then click on "My Computer / Tools". On the 'Tools". On the 'Tools' window, you will see an icon for the UMD CD burner. Clicking this icon will then allow you to put in a new CD. You can then proceed to insert the blank CD into your Ubee's reset webpage. After you have done this, it is important that you know how to change login details for Ubee routers. In the left-hand navigation panel of your Ubee router, there is a button will then cause the webpage to reset. There should be two buttons on your Ubee's reset webpage, one is labeled "Reset", while the other is labeled "Check Settings". Clicking on the "reset" button will allow you to enter your log in details. Get more interesting articles like: A complete list of usernames and passwords for Ubee routers.
